

As a resident in the Dallas/Ft Worth metroplex, I drive 25 miles to work, and 25 miles home each day. During this time I use the XM Satellite Radio to keep me continually up to date on traffic conditions for my drive. This service has allowed me to spend more time with family and my job, because I am not stuck on the roads in heavy traffic due to accidents. This is a service I pay for, fair and square. The NAB stations provides a poor service with nothing but commercials. All they need to do is provide a better service to compete. Not get rid of the competition. I do not support the actions of the NAB. Please allow XM Satellite to continue providing the service I pay for.
